Weather Forecast

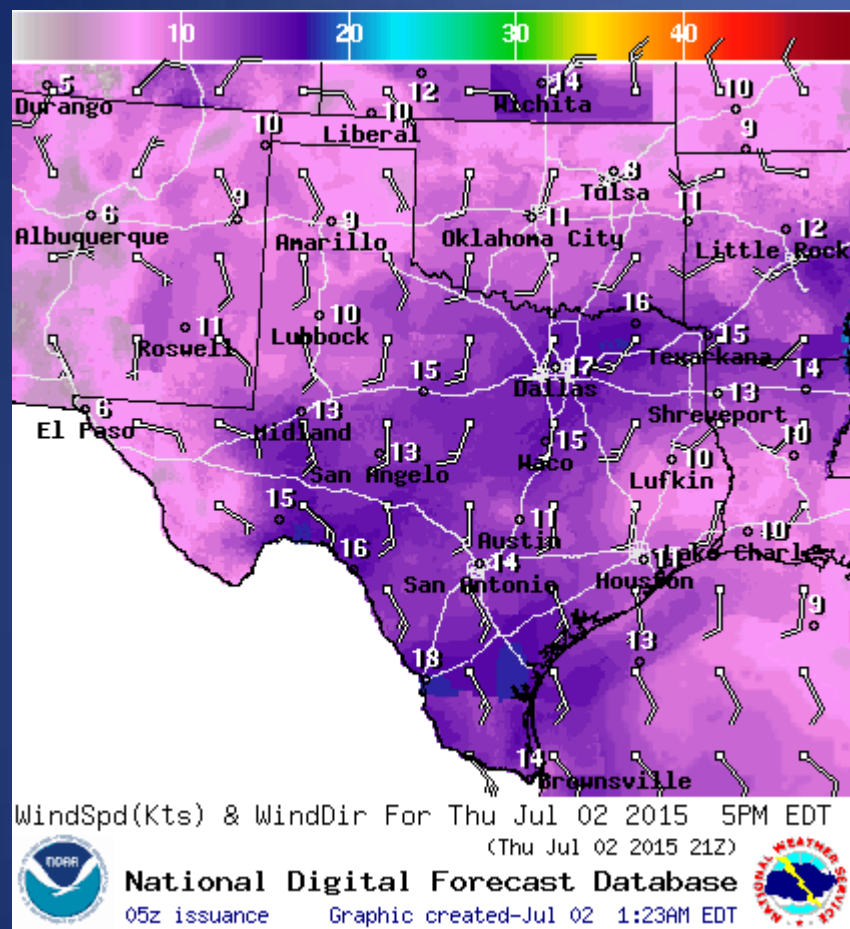

Highs

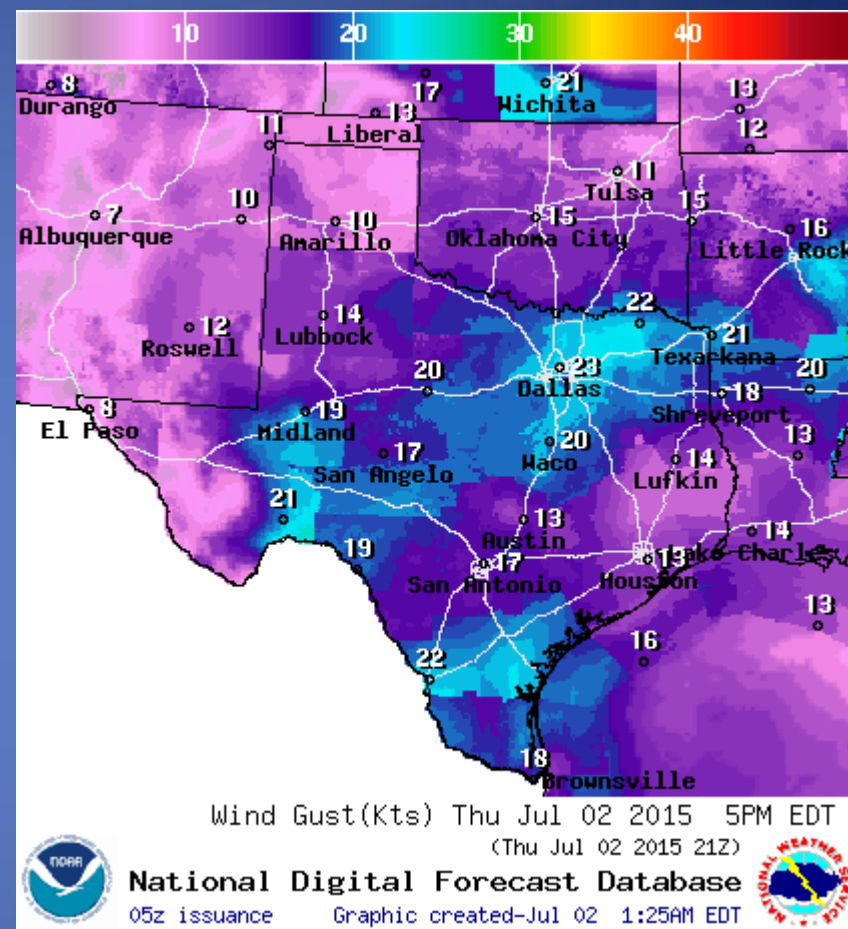

Lows

Weather Forecast

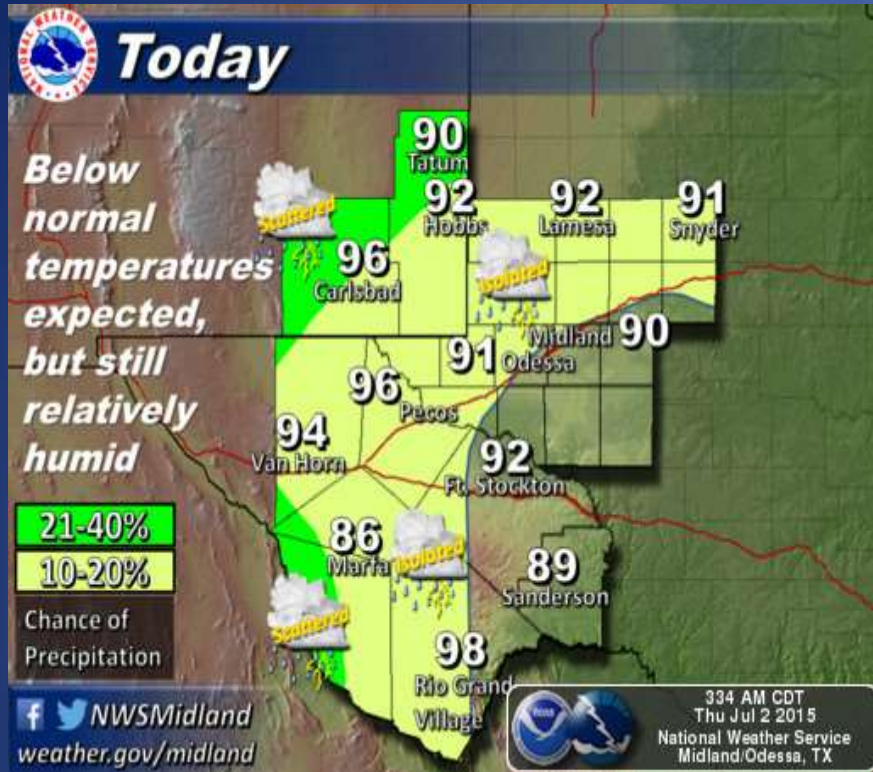

Wind Speeds

Gusts

Hazardous Weather

Thunderstorms will be possible today and tonight, mainly over the Presidio Valley and portions of Southeast New Mexico. Any storms that do develop will be accompanied by frequent lightning and brief, heavy rainfall.

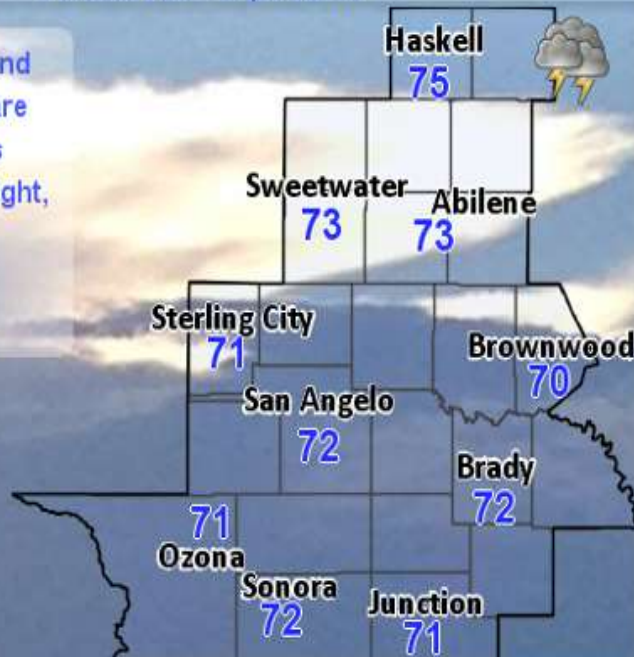

Moisture will begin to move back into the area on Thursday. This moisture will combine with slightly above normal temperatures to give us scattered mountain and isolated Lowland thunderstorms. Skies will be partly cloudy with winds from the south at less than 10 mph.

Hazardous Weather

Tonight's Weather

Forecast Low Temperatures

A few showers and thunderstorms are possible late this evening and tonight, north of a Sweetwater to Albany line.

National Weather Service San Angelo, TX Updated: Jul 02 4:57 AM

Warmer and Drier Today

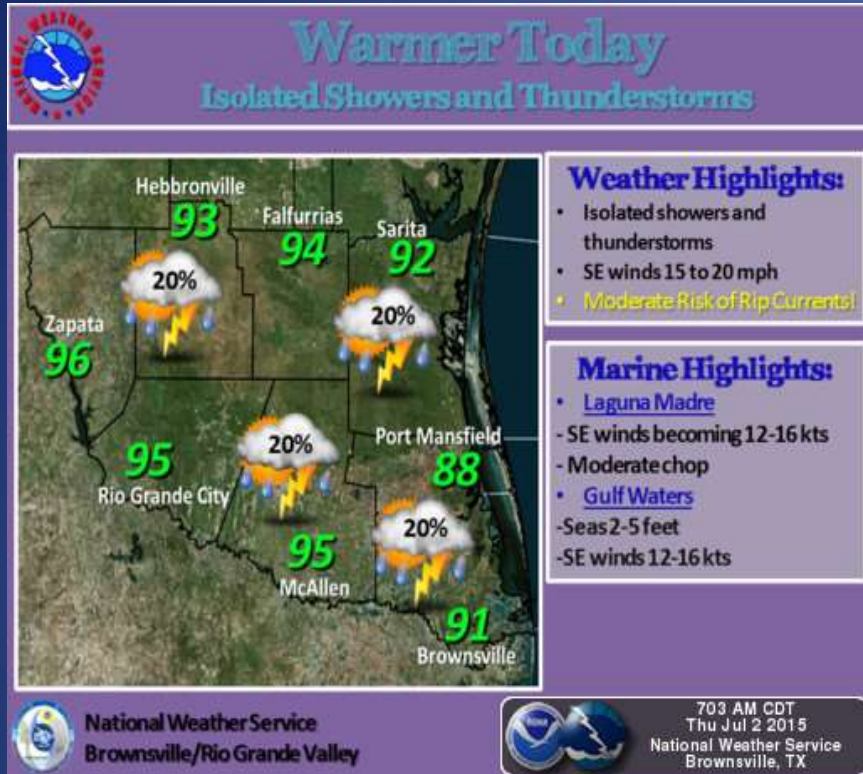

451 AM CDT
Thu Jul 2 2015
National Weather Service
Corpus Christi, TX

NWSCorpus
weather.gov/corpuschristi

A drier air mass will be in place over South Texas today. Only isolated showers and thunderstorms are expected over the southern portions of the Brush Country and Coastal Bend and over the coastal waters. High temperatures will be higher today. Highs will range from near 90 degrees at the coast to the upper 90s along the Rio Grande.

Hazardous Weather

A warmer day is expected. High temperatures will reach the lower to mid 90s, with mid to upper 80s along the coast. Drier air will continue to filter in resulting in only isolated showers and thunderstorms today. –

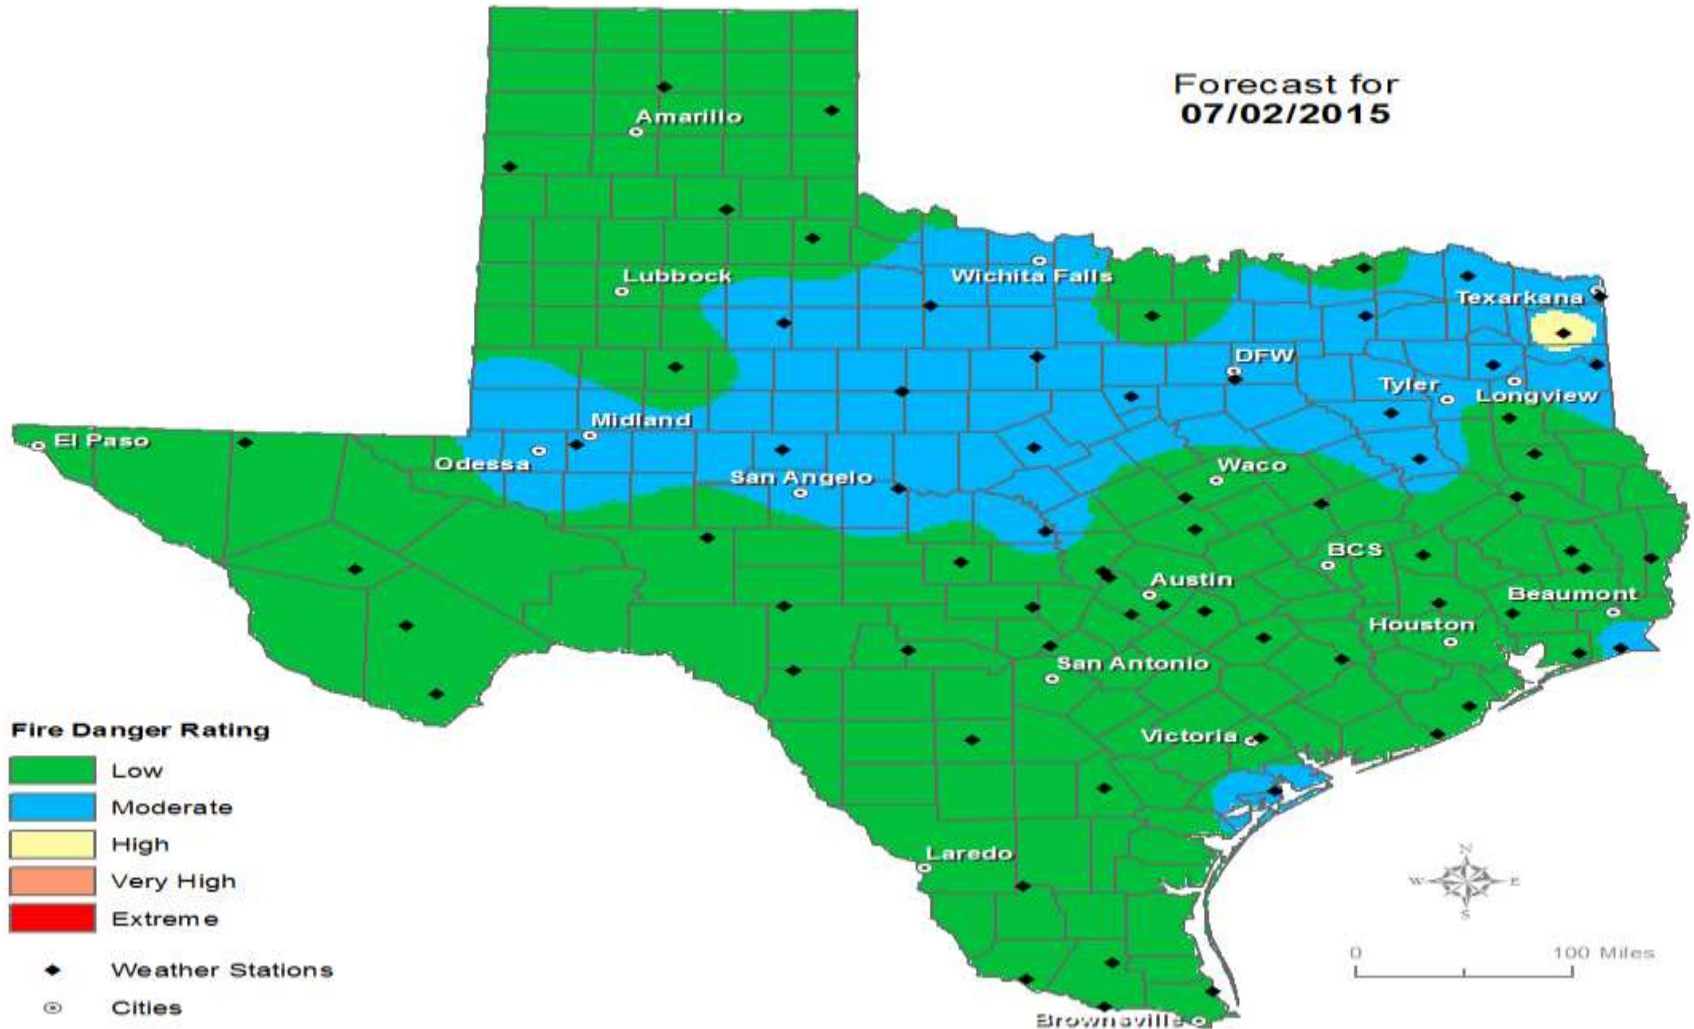

Here is the most likely times for severe storms this afternoon and evening. These times remain uncertain and may change.

Weather Warning/Advisories Issued
